DETAILED ACTION

A preliminary amendment of 7/15/03 canceled claims 1-34 and added new claims 78-87. However, the case did not contain claims 35-77. Therefore, claims 78-87 are renumbered as claims 35-44.

5 Claims examined on the merits are 35-44, which are all claims in the application.

Double Patenting

10 The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined
15 application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

25 A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.
30 Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 35-44 are rejected on the ground of nonstatutory
35 obviousness-type double patenting as being unpatentable over claims 1-53 of U.S. Patent No. 6,617,142 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because the presently claimed invention of forming a coating on a

Art Unit: 1651

medical device would have been obvious from the claimed invention of the patent of forming a coating on medical that is an invention encompassed by the present claims.

Conclusion

5 The claims are free of the prior art.

Patent ('552) is made of record to show related subject matter.
